

Model CDUP Series

Compression Load Cell
Specially Designed
For Truck Scales (15t~ 25t)

The model of CDUP is specially designed for truck and railroad scales in harsh environments. The effective integration of the CDUP mount and double ended shear beam load cell eliminates the need for troublesome check roads, links, expansion assemblies and other peripheral hardware.

The unique spherical ball point loading mechanism makes lateral movement of the assembly possible, while controlled floating of the scale deck is allowed.

High alloy tool steel load cell offers superior corrosion protection with waterproof potting.

- High overload tolerance
- Self centering design
- 0.02% accuracy
- Center loaded double ended shear beam design
- Protection against harsh environment
